ABSTRACT

There is provided a system for dispensing a plurality of perforated wipes having a perforation detach strength characteristic. The system includes a dispenser having a dispensing force characteristic and including a sealable chamber. The chamber is configured to retain the plurality of perforated wipes therein. A dispensing opening is in communication with the chamber. The opening is adapted to dispense wipes from the plurality of perforated wipes through the opening and out of the dispenser. A wiper blade is positioned in the dispenser to engage at least a portion of the wipes as the wipes dispense through the opening. When dispensing, a ratio of the perforation detach strength characteristic to the dispensing force characteristic is greater than 1:1.
